DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

1. Claim 24 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claimed invention must produce a "useful, concrete, and tangible result." *State Street*, 149 F.3d at 1373, 47 USPQ2d at 1601-02.

Claim 24 does not produce a tangible result. In order to overcome the rejection, claim language should be added that includes outputting, displaying, storing, or otherwise conveying the result of the previous method steps.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 25 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter that was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 25 was added in the 4/19/05 amendment and contains the limitations of "a threshold calculator" and "an analyzer". Support for these limitations is not found in the specification.

Application/Control Number: 10/661,572

Art Unit: 2863

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-22 and 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A claim using means plus function limitations without corresponding disclosure of specific structure or materials fails to particularly point out and distinctly claim the invention.

Dossel, 115 F.3d at 946-47, 42 USPQ2d at 1884-85.

In claims 1 and 4, the "means" limitations are carried out by a processor and no particular structures in the drawings or disclosure perform the claimed function.

In claim 25, the "threshold calculator" and "analyzer" are not found in the disclosure or drawings. The functions claimed as being carried out by these devices are actually carried out by a processor.

Please see MPEP 2106

Response to Arguments

Applicant's arguments filed 8/3/06 have been fully considered but they are not persuasive.

Applicant argues that claim 24 is directed a process and is therefore statutory. However, State Street (149 F.3d at 1373, 47 USPQ2d at 1601-02) found that the claimed invention must produce a concrete, useful, and tangible result. Claim 24 does not produce a tangible result.

Application/Control Number: 10/661,572

Art Unit: 2863

The final step in the body of claim 24 is "comparing the load state value of the current machining cycle with the moving variable threshold to determine a condition of the tool". This is not a tangible result. The condition has not been outputted, displayed, or saved so that it can be used. There is no tangible product because the condition of the tool has been determined, but it remains inside the processor and cannot be used. Therefore, a step must be added that includes outputting, displaying, storing, or otherwise conveying the result of the previous method steps.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Meagan S. Walling whose telephone number is (571) 272-2283.

The examiner can normally be reached on Monday through Friday 8:30 AM to 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Barlow can be reached on (571) 272-2269. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
